

Wayne Kousuke Yano

☎ (+63) 091 683 9321 | ✉ w4ynekousuke@gmail.com | 📍 Cebu City, Philippines

PROFILE

Aspiring Software Developer with a foundation in full-stack development, database design, and system analysis. Seeking more opportunities to gain hands-on industry experience, contribute to meaningful projects, and continuously develop skills in programming and in any collaborative efforts.

EDUCATION

University of San Carlos – Talamban Campus

Bachelor of Science in Information Technology - GWA: 1.54

2024 – Present (Expected 2027)

Cebu City, Philippines

SKILLS

Programming Languages : C, C#, Java, JavaScript (ES6+), SQL, PHP

Frontend Development : React.js, React Native (Expo), HTML5, CSS3, Tailwind CSS

Backend Development : Node.js, Express.js, Spring Boot (Java), RESTful API Development

Database & Management : MariaDB/MySQL, MongoDB, Supabase, Database Design & Normalization

Tools & Platforms : Git, GitHub, Docker, Postman, XAMPP

Core IT Concepts : Fullstack Development, Web Development, Mobile Development, Networking

PROJECTS

Sidequest | Backend & Frontend Developer | [GitHub](#)

- Built an odd-job marketplace app connecting posters and job seekers for informal, on-demand work
- Contributed to both backend logic and frontend interface, working across the full stack of the application

CineMatch | Backend Developer | [GitHub](#)

- Developed backend services for a movie and film discovery platform to help users find titles matching their preferences

GradeMaster | Backend & Frontend Developer | [GitHub](#)

- Developed a full-stack desktop application for managing courses, student records, and grades
- Implemented the application interface and backend services with persistent database storage

The BeansTalk | Backend & Frontend Developer | [GitHub](#)

- Developed a cafe business management web application featuring CRUD operations and administrative functionality
- Implemented the user interface, core application features, and frontend-backend integration

Colver: A Full Clinical Management System | Capstone Project

- Co-developing a web-based and mobile-enabled clinic management platform for a multi-branch pulmonological clinic
- Authored assigned sections of the capstone proposal and Software Requirements Specification, and contributed to system/database design

ORGANIZATIONS

Google Developer Groups on Campus – University of San Carlos

Member

Innovare USC Competition Guild

Non-Competing Member

CERTIFICATIONS

Intermediate Docker and Kubernetes

Dec. 2025

DataCamp

Linux Operating System

Aug. – Dec. 2025

Cisco Networking Academy

CCNA: Switching, Routing, and Wireless Essentials

Aug. – Dec. 2025

Cisco Networking Academy

STRENGTHS

Strong Analytical and Problem-Solving Skills • Excellent Debugging and Troubleshooting Abilities • Detail-Oriented and Quality-Focused • Team Player and Collaborator • Strong Written and Verbal Communication Skills • Adaptable to New Technologies • Organized with Good Time Management
